

Wind power generation at Fire Island

Chugach Electric Simulation of Wind Turbines on Fire Island

- 33 wind turbines will provide enough electricity to supply about 12% of our peak energy needs.
- 150,000 megawatts would power 16-18,000 average Anchorage homes.

Using LED Lights

- LED lights were installed in Town Square Park for the start of the “City of Lights” program.
- The City has replaced all the traffic lights with LED lights.

Ramping Up the Recycling Program

- City Hall Green Star
- Curbside survey
- Railroad traction glass
- Thermokool insulation
- Cardboard recycling

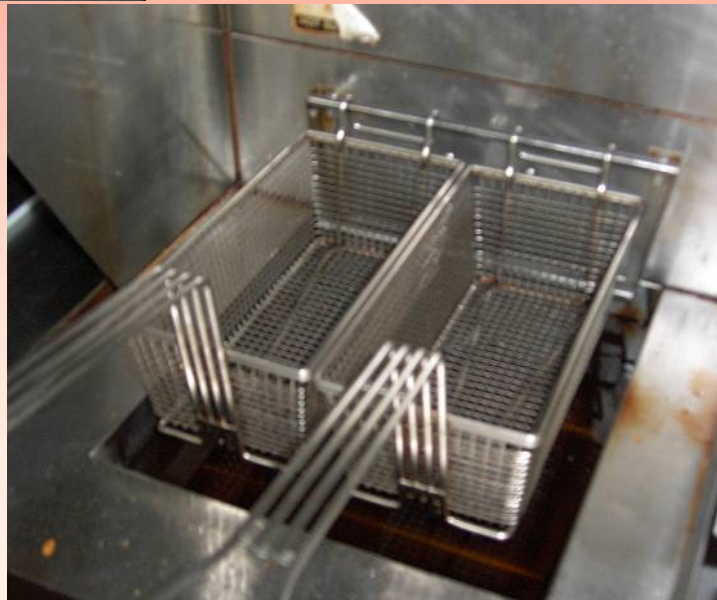

... and lots more!

- Muni computers “go to sleep” and cut carbon.
- Used cooking oil for paving.
- Started ML&P Customer Education Project.
- Sponsored city-wide electronics recycling and Muni program.

Sharing Information with Local Leaders

Girdwood, Alaska ★ September 2006
LOCAL ACTION MOVES THE WORLD

- Convened national mayors meeting in September 2006 to share success stories and see global warming impacts.
- Worked with Alaska Municipal League to pass statewide global warming policy.
- Working with Alaska youth to drive individual action.

Thank you
